

Application for Permit to Work on Champaign County Right of Way

Name, address, phone number and contact person of applicant.

Nature of work to be performed.

Approximate date work will commence and be completed.

We agree to the following conditions upon issuance of this permit.

1. To restore all disturbed surfaces to their original condition and adhere to the specifications or restrictions as outlined below.
2. To keep the disturbance to road surface and shoulders at a minimum. Trenches within the road and shoulder areas will be backfilled with gravel and tamped, so that settlement of the material is minimized. If settlement does occur, additional suitable material will be put into place and compacted. Applicant is responsible for maintaining surface until permanent repairs are made and responsible for permanent repair for one year after acceptance by the County Engineer.
3. All poles, pedestals, and buried cable markers shall be placed one foot inside the road right-of-way. Minimum cable depth is 30 inches unless otherwise specified. All loops to all pedestals must maintain a 36 inch depth under existing ditch lines. It is proposed to bury the cable in a trench around the end of drainage structures at a depth of approximately 36 inches. Terrain and soil conditions may not permit exact locations and depths as indicated above. In the event fiber optic cable is used, Champaign County Guidelines for the Installation of Underground Fiber Optic Cable must be followed. For specific details of this project, please refer to the attached plans. In the event any gas line is buried inside road right of way, the gas line shall be encased within steel pipe under the roadway.
4. All mailboxes, signs, yards, driveways, drainage structures, fences, ditches, sidewalks, or other pertinent property damaged or removed during initial construction or future maintenance will be replaced or repaired as good as or better than existing.
5. All road crossings where said road is hard-surfaced (blacktop, concrete, chip & seal, etc.) will be made using the _____ method unless further permission is granted from the County Engineer regarding cutting the pavement.
6. Traffic will be maintained at all times, unless permission is granted by the County to close the road. Any necessary lights, signs, barricades, and/or flagmen and watchmen will be placed on the job for the protection of traffic at all times, day and night, during the time this work is being done and that instructions given by the County as to handling of traffic will be fully complied with.

7. If, in the future, improvements or relocations are made to any of the above portions of roads it will be the financial responsibility of the applicant or successors to move or relocate such installations at the request of the governing authority.
8. To notify all property owners within the construction area at least two (2) working days before work begins.
9. Any drainage tiles encountered will be repaired or replaced.
10. To assume the responsibility for and to save the County, as signed below, harmless from any and all claims arising from the work performed, for personal injuries and property damages caused by the activities of the applicant, and to defend any action arising therefrom.
11. To notify all utilities in the right-of-way two (2) working days prior to construction by calling the Ohio Utilities Protection Service at 1-800-362-2764 for notification of member utilities. Non-members must be called directly.
12. To notify the County Engineer at least two (2) working days before starting construction and again upon completion of the work. (653-4848).
13. A copy of this utility permit will be displayed at the work site throughout the course of work and may be requested by County Engineer's Inspectors.
14. Upon completion of work the permittee will submit a signed copy of the right-of-way application certification to the Champaign County Engineer.
