I (We) do hereby swear that I am the applicant or his/their legally authorized representative and that the statements made in the foregoing application are true and correct to the best of my knowledge. I (We) agree to any limitation and special provision provided by the Champaign County Engineer. I (We) assume the responsibility for and will save the County harmless from any and all claims for personal injuries and property damage and shall defend any action that might be brought due to this work. To cover this responsibility, I (We) have the following insurance which is now and will remain enforced during the prosecution of this work:

Insurance Co. _____ Policy # _____
 Address _____ Amount _____

 Applicant's Signature Date

Permit for the above application under conditions agreed to is hereby granted in accordance with Ohio Revised Code Section 4513.34.

 Champaign County Engineer Date

Some permit movements may require special work for the protection of the public or highway facilities. Such work may include, but is not limited to, engineering analysis, route detours, special traffic control, temporary bridge shoring, or increasing the road structure number to accommodate a specific load. Processing fee, analyzing fee and inspection fee will be estimated for each permit. Reimbursement of the direct cost to the Champaign County Engineer for one hour or less will be waived. All hours will be rounded up to the next hour. Prior to the issuance of a permit when such work is required, the applicant will be responsible for the reimbursement of the total direct cost incurred by the County in the performance of such special work. Even though there is no application fee for this permit, the County Engineer will estimate the total direct costs to be incurred by the County and the applicant shall deposit this amount with the County in the form of cash, check, or money order prior to the performance of such work and issuance of a permit by the County. If the special work is not performed, then the entire deposit will be returned to the applicant. If the work is performed and the total direct cost is less than the amount on deposit, then any excess will be returned to the applicant. If the work is performed and the total direct cost is greater than the amount on deposit, then the applicant will be billed for the deficiency.

LIMITATIONS ON THE USE OF A SPECIAL HAULING PERMIT

1. The granting of a permit does not guarantee that the load described can be moved without damage to the pavement or structures; although the permit is granted on the assumption that the load can be moved without damage based on the best information available.
2. Permittee will be held liable for any damage caused by the movement. The County assumes no responsibility for damage to the permittee's equipment or load being moved due to any such failure. The permittee agrees to compensate Champaign County Engineer for any damage to a roadway, road or structures and also to hold Champaign County and the County Engineer harmless from all claims, damages, or proceedings of any kind and from all responsibility for person injury or property damage (public or private) caused directly or indirectly as a result of the transportation of said vehicle(s) or object(s).
3. The applicant must file a certificate of his liability insurance, showing that he has procured adequate insurance to cover the provisions of number two.
4. The permit shall be in the possession of the driver at all times during the progress of transportation and will be shown on demand to any police officer, state highway patrolman, or employee of the Champaign County Engineer's Office.
5. The permission granted restricts the movement of the vehicle(s) or object(s) to the highways specified, between the points designated, and within the time allotted.
6. Movements under a special hauling permit shall be made during daylight hours only and in such a manner to impede the least possible extent the normal highway traffic.
7. No vehicle(s) or object(s) being transported under a special hauling permit shall be left parked on the roadway either day or night except in the case of an emergency, in which case adequate protection shall be provided for the traveling public. The vehicle(s) shall not be loaded or unloaded within the limits of the highway.
8. The operator of the vehicle must comply with all laws, rules, and regulations covering movement of traffic over roadways and streets.
9. All construction equipment and other machinery shall have attached thereto a plate showing the manufacturer's name and the model.
10. Reductions in legal weight posted on roadways and bridges must be obeyed.
11. Permits will not generally be issued for built-up loads that are divisible into legal loads, or into loads of the least over dimension or the least over weight. If, in the event of an extenuating circumstance, a permit is issued for a divisible load, such load will be adequately described.
12. All movements shall be made at such speeds and in such a manner as to cause a minimum of interference with other traffic and minimum impact stress on structures and pavements.
13. Loads of extremely large dimensions shall require additional protective measures when necessary for the safeguarding of other traffic. Due regard shall be taken of traffic in both directions and every possible effort shall be made to prevent traffic congestion. One or more flagmen, or a pilot car, may be required.
14. Non-compliance with the general or special provisions of a permit, exceeding the weights or dimensions granted, or operating on dates or upon highways other than assigned shall render the permit null and void and the operator of the vehicle subject to arrest, as provided in Sections 5577.02 to 5577.05 inclusive of the Revised Code of Ohio.
15. A permit is void at any time road, weather, or traffic conditions make travel unsafe.
16. Applicant is responsible for all utility coordination.
